SUMMARY

Data & AI Automation Engineer who turns manual, multi-source data work into pipelines, dashboards, and LLM agents that run unattended. I built a 111-table warehouse fed by roughly 14 ETL pipelines (~12.2M rows) plus production AI tools (natural-language reporting and pipeline-monitoring agents), on a foundation of BI and QA-automation roles where I cut reporting time by 87.5% and defects by 4.9%. Industrial Engineer by training, pragmatic about shipping things that keep working after I walk away.

SKILLS

Data & Languages: Python (pandas), SQL, PostgreSQL, DuckDB / Parquet

AI: Claude API, MCP, NL-to-SQL, LLM agents, prompt engineering

BI & Reporting: Power BI, Power Query, Excel VBA / Macros, automated PDF reporting

Platform & Tooling: Supabase, GitHub Actions, Next.js, FastAPI, Playwright

Practices: ETL & incremental sync, data quality & deduplication, Lean Six Sigma

EXPERIENCE

Data & AI Automation Engineer · Nanoninth (Ontel)

2025 – present

- Hired as a Data Analyst; in practice I built the data platform solo. Replaced a manual pull-and-clean routine spanning APIs, Google and Microsoft Drive, Sheets, and email with roughly 14 automated ETL pipelines into a 111-table Supabase warehouse (~12.2M rows).
- Built DARA, a chat-first natural-language reporting tool on Claude and MCP (NL-to-SQL with Postgres row-level security and a defined-metric library), and Pipeline Guardian, an email-conversational ETL remediation agent with human-in-the-loop approvals.
- Shipped a Quote Automation System that took the accounting team from 20 to 30 hand-checked quotes a day to 100 to 200 plus, with batch PDF generation and live collaboration.
- Automated PDF report generation and built the dashboards on top of the warehouse.

Demand Planning Analyst II · Emerson (Copeland)

2023 – 2025

- Migrated a manual Excel forecast-tracking process into a real-time Power BI dashboard backed by a Python pipeline that cleans, merges, and consolidates raw demand data.
- Cut analyst hours and improved forecast accuracy while giving stakeholders live insight instead of waiting on hand-built reports.

Quality Assurance Engineer · Citizen Finedevice

2020 – 2023

- Automated quality-report data collection and cleaning with Excel Macros, VBA, and Power Query, reducing reporting time by 87.5% and freeing the team for actual analysis.
- Fed Lean Six Sigma Kaizen work that cut defects by 4.9%. Earned the company's Top Management's Choice Award (2022) for higher production rate, less reporting time, and fewer rejects.

Service Crew · McDonald's Tanauan

2016 – 2020

- Worked the front line through my Industrial Engineering degree, where I learned pace, reliability, and showing up.

EDUCATION

BS Industrial Engineering, Batangas State University, 2020

AWARDS & LEARNING

- Top Management's Choice Award, Citizen Finedevice (2022)
- In progress: Claude Certified Architect, Foundations (CCA-F)
